I am a Brazilian who, in December 2019, completed all degree requirements for my Ph.D. in Artificial Intelligence (AI) at the University of Regina in Canada. Now, I am eager to start working in industry, hopefully in a position involving some aspects of research. My graduate research focused on probabilistic graphical models such as Bayesian networks (BNs) and deep learning models, including sum-product networks (SPNs). I have been active in research since 2013. I have published 25 peer-reviewed papers, including one paper at AAAI-2019. The interest in this paper led to a formal invitation to visit the University of Cambridge for three months, yielding a joint research paper posted on arxiv (<https://arxiv.org/abs/1912.10092>), which is to be submitted to ICML-2020. I have been asked to be a program committee member at ICML-2020. I completed my undergrad in Electrical Engineering at the Universidade Federal de Viçosa in Brazil, one of the best universities in the country. I have been awarded numerous scholarships worth over \$100K CDN in total.
